Supervised Learning: Building a Student Intervention System

Robert M Salom

June 16, 2017

1 Obective

The goal of this project is to identify students who might need early intervention. We want to predict whether a given student will pass or fail based on information about his life and habits. Therefore we approach this task as a classification problem with two classes, pass and fail.

2 Dataset

In what follows we will be working with part of the Student Performance Data Set from the UCI machine learning repository. It is composed of 395 data points with 30 attributes each. The 31'st attribute indicates whether the student passed or failed. Here is a brief description of each feature:

2.1 Attributes for student-data.csv:

- school student's school (binary: "GP" or "MS")
- sex student's sex (binary: "F" female or "M" male)
- age student's age (numeric: from 15 to 22)
- address student's home address type (binary: "U" urban or "R" rural)
- famsize family size (binary: "LE3" less or equal to 3 or "GT3" greater than 3)
- Pstatus parent's cohabitation status (binary: "T" living together or "A" apart)

- Medu mother's education (numeric: 0 none, 1 primary education (4th grade), 2 5th to 9th grade, 3 secondary education or 4 higher education)
- Fedu father's education (numeric: 0 none, 1 primary education (4th grade), 2 5th to 9th grade, 3 secondary education or 4 higher education)
- Mjob mother's job (nominal: "teacher", "health" care related, civil "services" (e.g. administrative or police), "athome" or "other")
- Fjob father's job (nominal: "teacher", "health" care related, civil "services" (e.g. administrative or police), "athome" or "other")
- reason reason to choose this school (nominal: close to "home", school "reputation", "course" preference or "other")
- guardian student's guardian (nominal: "mother", "father" or "other")
- traveltime home to school travel time (numeric: 1 < 15 min., 2 15 to 30 min., 3 30 min. to 1 hour, or 4 > 1 hour)
- studytime weekly study time (numeric: 1 <2 hours, 2 2 to 5 hours, 3 5 to 10 hours, or 4 >10 hours)
- failures number of past class failures (numeric: n if $1 \le n \le 3$, else 4)
- schoolsup extra educational support (binary: yes or no)
- famsup family educational support (binary: yes or no)
- paid extra paid classes within the course subject (Math or Portuguese) (binary: yes or no)
- activities extra-curricular activities (binary: yes or no)
- nursery attended nursery school (binary: yes or no)
- higher wants to take higher education (binary: yes or no)
- internet Internet access at home (binary: yes or no)
- romantic with a romantic relationship (binary: yes or no)
- famrel quality of family relationships (numeric: from 1 very bad to 5 excellent)

- freetime free time after school (numeric: from 1 very low to 5 very high)
- goout going out with friends (numeric: from 1 very low to 5 very high)
- Dalc workday alcohol consumption (numeric: from 1 very low to 5 very high)
- Walc weekend alcohol consumption (numeric: from 1 very low to 5 very high)
- health current health status (numeric: from 1 very bad to 5 very good)
- absences number of school absences (numeric: from 0 to 93)
- passed did the student pass the final exam (binary: yes or no)
